Professional Summary

Recent Computer Science graduate with hands-on experience in software development, cloud computing, and full-stack web applications. Skilled in Java, Python, C/C++, React.js, and PostgreSQL, with a Strong understanding of networking, cybersecurity, and cloud platforms. Passionate about building scalable, high-performance solutions and eager to contribute to innovative projects.

Certifications

- AWS Certified Cloud Practitioner
- Introduction to Linux
- Data Science Tools - IBM

Education

University of Alberta

Edmonton, Alberta

Bachelor of Science in Computer Science

- **Relevant Coursework:** Data Structures and Algorithms, Software Engineering , Computer Networks , OS Fundamentals , Computer and Network Security , Information Retrieval , Web Development , File and Database Management , App Development , Machine Learning , Artificial Intelligence , Object-Oriented Programming

Projects

Cardify | *Spring Boot, React.js, PostgreSQL, OAuth2, Docker*

- Developed a dynamic platform enabling professionals to create and share personalized digital business cards integrated with portfolio showcases..
- Implemented secure Google OAuth2 authentication alongside custom manual registration with robust password security.
- Designed and managed a PostgreSQL relational database to store user and portfolio information, enabling scalable user data management.
- Automated deployment using Docker containers for efficient development and deployment cycles.

QR Code Event Check-In | *Java, Firebase*

- Developed an intuitive Android application for event management, enabling attendees to check in via QR codes.
- The system facilitates real-time attendance tracking, event detail management, and notification distribution to participants.
- Integrated Google API for location tracking in the QR Check-In app, enabling precise, real-time location services that enhanced the app's utility and user satisfaction.
- Contributed for designing the user interface (UI) of the QR Check-In app, focusing on user-centric design principles to ensure intuitive navigation and a seamless user experience.

SPARK | *ASP.NET, Razor Pages, MySQL*

- Developed a fully functioning online computer store with customer and order management features.
- Integrated a back-end database to replace hardcoded data, supporting dynamic customer and order information.
- Implemented authentication and session management to personalize the user experience.

File Encryption/Decryption Tool | *C++, File I/O, XOR Encryption Algorithm*

- Developed a command-line tool in C++ for encrypting and decrypting files using XOR-based encryption.
- Implemented XOR encryption, ensuring symmetric and reversible transformations.
- Allowed seamless cycling of keys for encrypting files of varying sizes.

Technical Skills

Languages: Python, Java, XML, C/C++, PHP, Ajax, HTML, CSS , Javascript, SQL, NoSQL, JSON, XSLT

Technologies: React.js, Node.js, SpringBoot, Django, ASP.NET, Postman, Android SDK, Node.js, MongoDB, Git, Wireshark, Firebase, AWS, Nmap, Snort, Docker, CNET, Power BI

Concepts: Cloud Computing, Cloud Security, Web Development, Software Engineering, Data Structures, Algorithms, Object-Oriented Design, Database Management, Machine Learning, Agile, Networking, Linux, Data Modeling
